reported an eight percent decrease. In Nicaragua, however, fuel prices remain unchanged since April 2022. However, in all three countries, prices remain well above the five-year average, with variations of 43 percent in El Salvador, 21 percent in Honduras, and 35 percent in Nicaragua.

- The number of remittances sent continues to exceed the values reported in September 2022 in El Salvador and especially in Nicaragua (which reported an increase of 42 percent due to the rise in permanent migration from the country).
- The continuous high temperatures and poor rainfall since the beginning of June have decreased the availability of water resources for agricultural activities. In September, accumulated rainfall was between 40 and 70 percent lower than average in eastern El Salvador, western, northern, southern, and southeastern Honduras, and the entire western half of Nicaragua, with the most critical values on the Pacific coast of the latter. This has an impact on the development of *Postrera* crops and means that subsistence producers are less inclined to plant these crops.

migration, and that no significant changes are expected in the socioeconomic and political factors behind it, this country will continue to report a higher rate of growth compared to the rest of the region.

- Given the strengthening of the El Niño phenomenon throughout the period covered by this report, deficient rainfall and above-average temperatures are still forecast. The expected result is a decrease of at least 25 percent in subsistence crop yields for the *Postrera* and Late *Postrera*/*Apante* seasons. Similarly, dry conditions with irregular rainfall will cause a delay in planting for the *Primera* 2024 cycle.
- The unfavorable weather conditions will slightly delay the coffee harvest and will lead to an irregular ripeness of the crop, in addition to a shorter harvest due to the decrease in yields. Therefore, day laborers will receive a lower total income later in the year, which will not be offset by the slight increase in day laborer payments reported since last year.
