Climate Prediction Center's Central America Hazards Outlook
For DOS FEWS-NET
30 July – 05 August 2026

Drought and abnormal dryness are expanding across parts of Central America.

1. Next week, the forecast indicates moderate to heavy rainfall in the Caribbean-facing areas of Honduras, Nicaragua, Costa Rica, as well as eastern Costa Rica and Panama. Combined with recent heavy rainfall, these conditions are likely to increase the risk of flooding in these areas.

2. Warmer-than-average conditions were observed across Central America and are expected to persist in northern and southern Guatemala, northern Belize, El Salvador, western Honduras, western Nicaragua, and western Costa Rica. Maximum temperature anomalies of up to 6°C are forecast during the outlook period.

3. Insufficient rainfall has resulted in large 30-day and 90-day rainfall deficits, leading to drought conditions in parts of Guatemala, Honduras, El Salvador, and Nicaragua and negatively affecting crops. This week, areas of abnormal dryness have expanded into western Honduras and parts of El Salvador, as continued below-average rainfall over the past month has exacerbated dry conditions.

Note: The Hazards outlook map is based on current weather and climate information, including short and medium range weather forecasts (up to 1 week), sub-seasonal forecasts from 2 to 4 weeks, and monthly and seasonal forecasts. The outlooks provide an assessment of the potential impact of extreme events on crop and pasture conditions. Shaded polygons are added in areas where anomalous conditions have been observed and predicted to continue during the outlook period. The boundaries of these polygons are only approximate at the spatial scale of the map. FEWS NET is a DOS-funded activity whose purpose is to provide objective information about food security conditions. Its views are not necessarily reflective of those of DOS or the U.S. Government. The FEWS NET weather hazards outlook process and products include participation by FEWS NET field and home offices, NOAA-CPC, USGS, USDA, NASA, and a number of other national and regional organizations in the countries concerned.
